ONDOKUZ MAYIS UNIVERSITY

FACULTY OF MEDICINE

YEAR 5

NERVOUS SYSTEM BLOCK

STUDY GUIDE

30.11.2026– 08.01.2027

BLOCK ORGANIZATION

The block consists of 6 weeks. The first day of the block consists of neurological examination sessions. Assessment and evaluation also take place on the last two days of week 6.

Bedside Teaching: The faculty members listed under each group will conduct bedside teaching in the clinics of the relevant department. During bedside teaching, students will be divided into groups (three groups).

Lectures: Lectures will be delivered to all students in the block by the faculty members listed in the program, in the classrooms specified in the program.

End-of-Task Assessment: For the end-of-task assessment, students are divided into groups (6 groups). The end-of-task discussion and assessment of the students in each group are conducted simultaneously by the faculty members teaching in the block.

Outpatient Clinic Work: This is carried out in the neurology and neurosurgery outpatient clinics during the relevant hours in the program, based on the groups formed for the end-of-task assessment. Students will work up patients, perform physical examinations, and discuss the cases with the responsible faculty members or specialists in accordance with the clinical work guide.

Ward Work: This is carried out in the neurology and neurosurgery wards during the relevant hours in the program. The allocated patients will be worked up by the students in the form of case follow-up files. These files will be discussed with the responsible faculty members on the last day of each task. Each student will record the daily follow-up of his or her patient in the file.

Assessment: Block performance is assessed on a 100-point scale. The block grade is composed of the progress test, bedside teaching and end-of-task assessment score (20%), the clinical skills score (20%), the patient management skills score (20%), and the knowledge examination score (40%). The sum of the clinical skills and patient management skills scores must be at least 20. To pass a block, students must meet the attendance and threshold criteria and obtain a block grade of at least 70 out of 100 points. Students who fall short in any of these are considered to have failed the block and sit the reset examination on the date set by the Dean’s Office. Students who also fail the reset examination must repeat the block. The patient management skills examination consists of at least six questions (from the areas of headache, seizure/coma, central weakness, peripheral weakness, forgetfulness, and movement disorders). The patient management skills examination questions are prepared and graded by the relevant task coordinator and/or assistant.

Attendance is taken at lectures, bedside teaching sessions, and all other practical activities. A student whose absence exceeds the period specified in the regulations is considered to have failed.

Lectures: Neurology lecture room

Patient Work-Up: Neurology and Neurosurgery wards

Bedside Teaching: Neurology and Neurosurgery wards

Practical Sessions: Neurology and Neurosurgery outpatient clinics and wards
